

STUMP ROAD RECONSTRUCTION

▷ OPEN HOUSE | MAY 20, 2021

Comment Form

The City of Dardenne Prairie has completed preliminary engineering and design of proposed roadway improvements along Stump Road, between the Route 364 North Outer Road and Feise Road. The project involves reconstructing and widening of Stump Road, consisting of a two-way center turn lane to provide a safer opportunity for traffic turning into driveways and adjacent streets. The project also includes drainage improvements and providing sidewalks on both sides of the roadway through the project limits. The City and the consultant retained to assist the City with this project are interested in hearing your thoughts about the proposed improvements. Your comments will be used to transition the plan from preliminary design to final design.

Your comments are important to us. Please take a moment to provide feedback on the topics listed, as well as others that you may have. We ask that you return any comments by either dropping them off with us before you leave, or by submitting them to either of the following individuals by June 21, 2021.
